Spanovatech Infra Equipment

An interface of Advancement & Technology

Spanovatech Infra Equipment Pvt. Ltd. is one of the pioneers in the manufacturing of construction equipment. Our state-of-the-art facility is located at Vadodara, Gujarat-India. The experienced professionals focus highly on research, development, and quality. Our best-in-class range of equipment includes Vertical Material Handling Solutions -Wire Rope (builder hoist, towers hoist and mini lift) rebar processing equipment and other construction equipment.

Our team holds true to high standards and ensure that our values of excellence, teamwork, commitment are reflected in our work. The team always feels continuously challenged and supported to deliver the best outcome and stands by the belief of "Advancement & Technology".

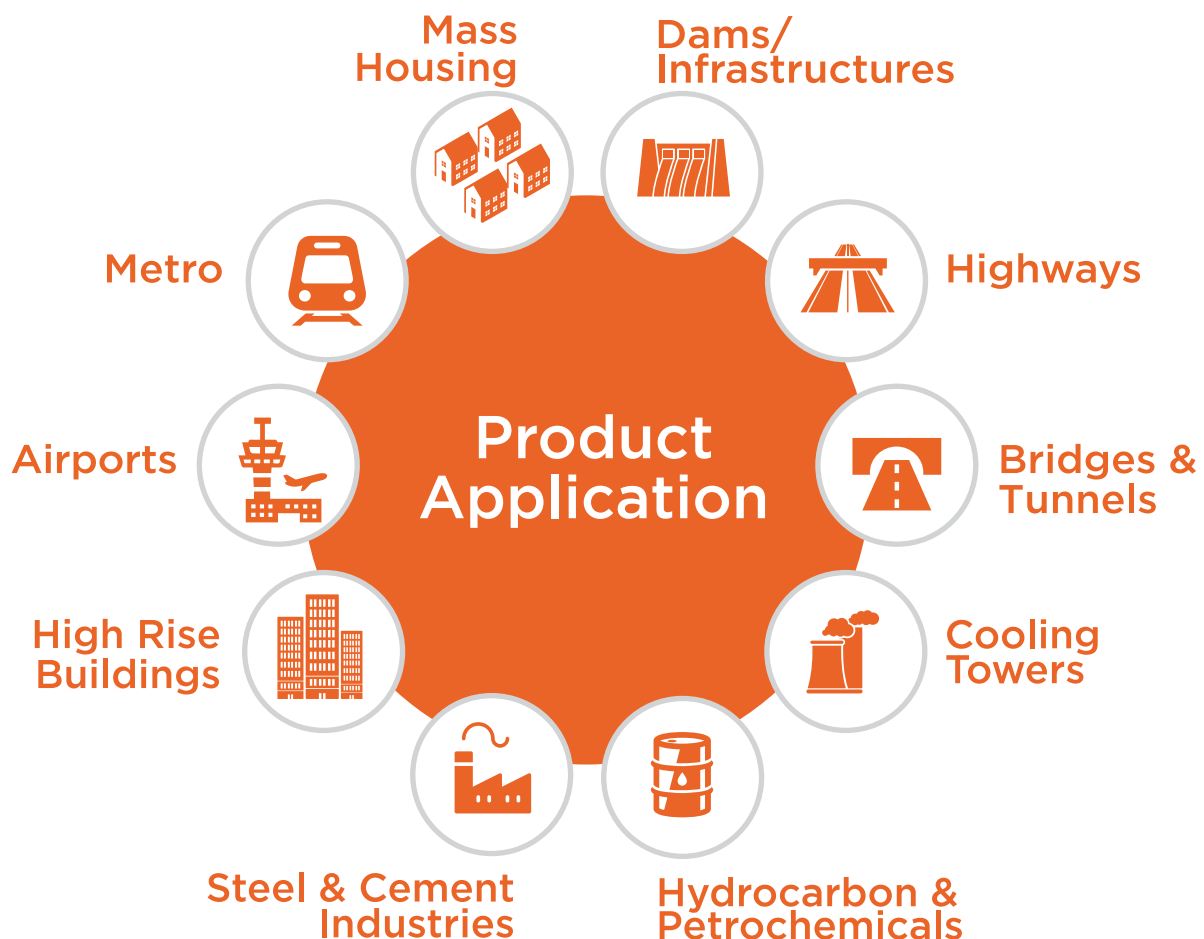

Area of Expertise:

- Production with Advanced Technology
- Design to Build
- Knowledge-Based Engineering
- Modularization & Standardization
- Cost Optimization
- Product Localization

Product Attributes:

- Assured Quality
- Minimized Total Cost
- Supporting Localization
- Optimizing the Process
- Meeting Global Standards
- Matching Client's Identity

Spanovatech Infra Equipment Pvt. Ltd. is associated with a varied range of industries with enormous product experience in each sector & is ready to expand diversely.

REBAR PROCESSING EQUIPMENT

BAR CUTTING

SC 42/52/55

- Used for bar Ø 12 to Ø 42
- Safety as per European STD
- Rugged & Stable design

SB 42/52/55

BAR BENDING

- Used for bar Ø 12 to Ø 42
- Safety as per European STD
- Max bend radius up to 5D of Ø42, 6D of Ø36, 8D of Ø40
- Rugged & Stable design
- Operator friendly

TMT SPRIAL BENDING

SSRB 52

- Diameter of bar upto 25
- Safety as per European STD
- Ring diameter upto 600
- Rugged & Stable design
- Operator friendly

SRB 52

TMT RING BENDING

- Diameter of bar upto 32
- Safety as per European STD
- Ring diameter upto 750 mm
- Rugged & Stable design
- Operator friendly

VERTICAL MATERIAL HANDLING SOLUTION - WIRE ROPE

SUSPENDED ROPE PLATFORM

SRP 800/1000

- Platform length upto 9 mtr
- All safety features
- Indian design
- Indigenous gear box
- Multiple options as per the building design

STH 100/150

TOWER HOIST

- Height up to 150 mtr
- Increased safety with geared break
- Motor controlled lowering of bucket
- Usha Martin wire rope
- Heavy angle mast
- Multiple attachments of brick bucket, concrete bucket & rebar carrier

BUILDER HOIST

SBH 25/50

- Height upto 50 mtr
- Diesel engine/Electric motor
- Pipe scaffolding
- Chassis with pneumatic tyre options
- Heavy mast design
- Multiple attachments brick bucket & concrete bucket

SML 200/350/550

MINI LIFT

- Higher boom length
- Easy to install
- Anti twist rope
- Top limit switch
- 360 degree rotation
- Sturdy machine body

VERTICAL MATERIAL HANDLING SOLUTION - RACK & PINION

MULTIFUNCTIONAL TOWER HOIST

SRTH 100/150

- Height upto 150 mtr
- Safety as per European STD
- Multifunctional Hoist
- Rebar carrier option
- Brick bucket and concretebucket options Rack & pinion mechanism
- Safety device
- Heavy Angle Mast
- Wall tie design

SPM 100/150/200

PASSENGER & MATERIAL HOIST (TWIN CAGE)

- Height upto 350 mtr
- Safety - As per European STD
- Fully powder coated cabin and hot dip galvanised masts
- Robust design for long life
- For passenger and material movement

PASSENGER MATERIAL HOIST

SPM 100/150/200

- Models SPM 100/150/200
- Height upto 350 mtr
- Safety - As per European STD
- Fully powder coated cabin and hot dip galvanised masts
- Robust design for long life
- For passenger & material movement
- Twin cage available

SMH 100/150/200

SPANOVATECH MATERIAL HOIST

- Height upto 350 mtr
- Safety as per European STD
- Multifunction Hoist
- Rebar carrier option
- Brick bucket & concrete bucket options
- Rack and pinion mechanism
- Safety device
- Can transport marbles, glass & plywood

OTHER PRODUCTS

CONCRETE MIXER

SCM100/200/
300/400Ltr

- SCM100/200/300/400Ltr
- RM 800/1050
- Electric Motor/Diesel Engine Operated
- With & without Hopper
- Rigid & Sturdy Chassis
- Low noise & Stable

CUT LENGTH

- Ready to use cut length
- Bars are available from Dia 8mm to 40mm
- Eliminate the wastage & labour requirement
- Prepared as per the customer's design & BBS

CUT & BEND

- Ready to use Reabr Cut & Bend
- Latest European Technology
- Available in Different size & shape
- Fully Automated Process

COUPLER

- Available from Dia 16mm to 40mm
- Full Tension splice provides 100% load transmission
- Compliance with BS 8110, ACI 318, DIN 1045 & other international standards

Spanovatech Group

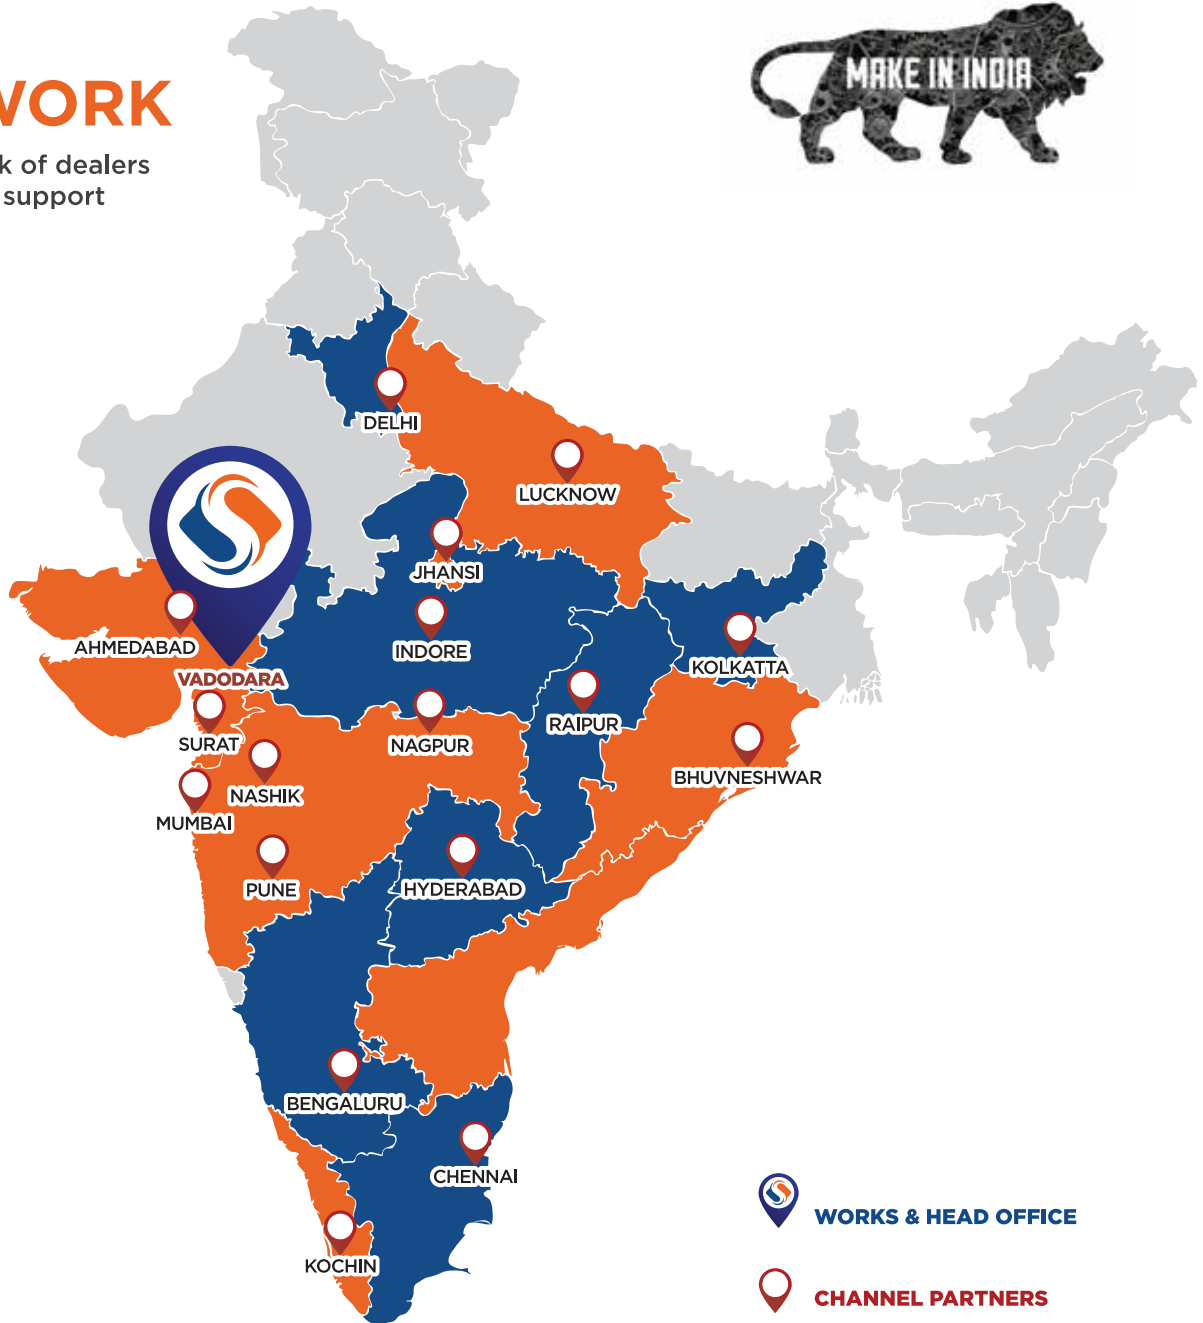

Spanovatech infra equipment: Cutting & Bending Machine, Vertical Material Handling (Rack & Pinion-Single Cage, Twin Cage, Tower Hoist, Multi-Functional Material & Tower Hoist, Work Platform, (wire Rope Multifunctional Material & Tower Hoist, Builder Hoist & Mini Lift) are highly standardized equipments as per European standard. These equipment are used at various engineering sites for cutting and bending bars & lifting raw materials to higher stories. the machine assures best quality and safety measures, with its robust design, they are bound to maintain performance each year.

SPANOVATECH GROUP OF COMPANIES:

Spanovatech Group was established in June 2016 focusing itself on being a pioneer in the infra equipment industry. Serving a gigantic scale of industries with our products and also giving quality services.

NETWORK

Large network of dealers
& unmatched support

-  **WORKS & HEAD OFFICE**
-  **CHANNEL PARTNERS**

Spanovatech Infra Equipment dealers are equipped to provide A-Z solutions for material handling equipment. We constantly invest in selecting, developing & supporting our dealers, where our global network ensures you receive not just the best equipment but also the best service, advice & support.

SPANOVATECH™
An Interface of Advancement & Technology

Head Office:

Plot No.: 414, GIDC Industrial Estate, Near Shaily Engineering,
Halol, Panchmahals, Gujarat - 389350, India.
